

During the abstract submission process, you will be asked to select one primary parent category and one secondary parent category, each with a corresponding sub-category, to best describe your research. These selections should reflect both 1) the research topic under investigation and 2) the methodology employed or developed.

IMPORTANT: These choices will be used to assign reviewers for your abstract and determine your poster number in the poster hall.

Please see the list of available terms below.

Primary and Secondary Parent categories = **BLUE**

Sub-categories = **GRAY**

BRAIN STIMULATION

- Deep Brain Stimulation
- Direct Electrical/Optogenetic Stimulation
- Non-invasive Electrical/tDCS/tACS/tRNS
- Non-invasive Magnetic/TMS
- Sonic/Ultrasound
- TDCS
- TMS
- Invasive Stimulation Methods Other
- Non-Invasive Stimulation Methods Other

CLINICAL CONDITIONS OF THE NERVOUS SYSTEM

- Neurodegenerative / Late Life (e.g., Parkinson's, Alzheimer's)
- Neurodevelopmental / Early Life (e.g., ADHD, autism)
- Psychiatric (e.g., Depression, Anxiety, Schizophrenia)

EDUCATION, HISTORY AND SOCIAL ASPECTS OF BRAIN IMAGING

- Education, History and Social Aspects of Brain Imaging

EMOTION, MOTIVATION AND SOCIAL NEUROSCIENCE

- Emotional Learning
- Emotional Perception
- Reward and Punishment
- Self Processes
- Sexual Behavior
- Social Cognition

- Social Interaction
- Social Neuroscience Other
- Emotion and Motivation Other

GENETICS

- Genetic Association Studies
- Genetic Modeling and Analysis Methods
- Neurogenetic Syndromes
- Transcriptomics
- Genetics Other

HIGHER COGNITIVE FUNCTIONS

- Decision Making
- Executive Function, Cognitive Control and Decision Making
- Imagery
- Music
- Reasoning and Problem Solving
- Space, Time and Number Coding
- Higher Cognitive Functions Other

IMAGING ACQUISITION METHODS

- Anatomical MRI
- BOLD fMRI
- Diffusion MRI
- EEG
- Imaging of CLARITY
- MEG
- MR Spectroscopy
- Multi-Modal Imaging
- NIRS
- Non-BOLD fMRI
- Optical Coherence Tomography (OCT)
- PET
- Polarized Light Imaging (PLI)
- Imaging Methods Other

LANGUAGE

- Language Acquisition
- Language Comprehension and Semantics

- Reading and Writing
- Speech Perception
- Speech Production
- Language Other

LEARNING AND MEMORY

- Implicit Memory
- Long-Term Memory (Episodic and Semantic)
- Neural Plasticity and Recovery of Function
- Skill Learning
- Working Memory
- Learning and Memory Other

LIFESPAN DEVELOPMENT

- Adulthood and Later Life
- Childhood and Adolescence
- Peri- and Neo-natal Development
- Lifespan Development Other

MODELING AND ANALYSIS METHODS

- Activation (e.g., BOLD task-fMRI)
- AI in Neuroimaging
- Bayesian Modeling
- Classification and Predictive Modeling
- Connectivity and Network Modeling
- Diffusion MRI Modeling and Analysis
- EEG/MEG Modeling and Analysis
- Exploratory Modeling and Artifact Removal
- Image Registration and Computational Anatomy
- Longitudinal Data Analysis
- Methods Development
- Motion Correction and Preprocessing
- Multivariate/Univariate Modeling
- PET Modeling and Analysis
- Segmentation and Parcellation
- Task-Independent and Resting-State Analysis
- Modeling and Analysis Methods Other

MOTOR BEHAVIOR

- Brain Machine Interface
- Mirror System
- Motor Planning and Execution
- Visuo-Motor Functions
- Motor Behavior Other

NEUROANATOMY

- Anatomy and Functional Systems
- Brainstem
- Cerebellum
- Cerebral Cortex
- Comparative Neuroanatomy
- Microcircuitry and Modules
- Neurovascular System
- Non-human
- Subcortical Structures
- White Matter Anatomy, Fiber Pathways and Connectivity
- Neuroanatomy Other

NEUROINFORMATICS AND DATA SHARING

- Brain Atlases
- Databasing and Data Sharing
- Quality Control
- Workflows
- Informatics Other

PERCEPTION, ATTENTION AND MOTOR BEHAVIOR

- Attention: Auditory/Tactile/Motor
- Attention: Visual
- Brain Machine Interface
- Chemical Senses: Olfaction, Taste
- Consciousness and Awareness
- Mirror System
- Motor Planning and Execution
- Perception: Auditory/Vestibular
- Perception: Multisensory and Crossmodal
- Perception: Pain and Visceral
- Perception: Tactile/Somatosensory

- Perception: Visual
- Sleep and Wakefulness
- Visuo-Motor Functions
- Perception and Attention Other
- Motor Behavior Other

PHYSIOLOGY, METABOLISM AND NEUROTRANSMISSION

- Cerebral Metabolism and Hemodynamics
- Neurophysiology of Imaging Signals
- Pharmacological Modulation
- Transmitter Receptors
- Physiology, Metabolism and Neurotransmission Other
